

Technical specification

Technical data and pictures are not binding. Sasso reserves the right to make changes without notice. Speed and modality of cutting can vary according to the thickness and the type of material.

TECHNICAL DATA

Disc diameter min/max	inches	13,78 - 24,6	mm	350 - 625
Beach dimensions	inches	131,89 x 78,74	mm	3350 x 2000
X axis	inches	143,7	mm	3650
Y axis	inches	86,6	mm	2200
Z axis	inches	14,5	mm	370
Disc inclination	degrees	0° - 90°	degrees	0° - 90°
Spindle motor	kW	13,6 (S6)	kW	13,6 (S6)
Spindle rotation speed	rpm	800 - 5000	rpm	800 - 5000
Water consumption	gal/min	11	lt/min	40
Approximate weight	lb	7700	kg	3500

The best for countertops

The entire K600 line is made-up of 5 Axis CNC saws. The machines are powerful, accurate, and reliable. They're ideal for straight, curved, and inclined cuts as well as profiling with either a blade or finger bit. These machines are Sassumeccanica's top product and are considered the most accurate and reliable in the market. Compact, versatile and powerful. Designed and built to provide the maximum performance in the minimum possible space. High rigidity monoblock frame fully hot galvanized.

1 Made to last

Thanks to the robust structure made of hot galvanized steel and the superior design, the K600 machines are strong and made to last.

2 Accurate

Accurate The X and Y movements are made with linear bearings and helical rack and pinion in order to deliver speed and accuracy.

3 Reliable

The high quality and technologically advanced parts make the K600 a very reliable high performance machine that will stand the test of time.

4 Versatile

Easy or complex shapes are not a problem. The Sassumeccanica software is fast and versatile whether your making cuts with a blade or shapes with a finger bit.
