## Technical specification

Technical data and pictures are not binding. Sasso reserves the right to make changes without notice. Speed and modality of cutting can vary according to the thickness and the type of material.

### TECHNICAL DATA

Disc diameter min/max	inches	13,8 - 24,6	mm	350 - 625
Bench dimensions	inches	137,7 x 78,7	mm	3500 x 2000
X axis	inches	143,7	mm	3650
Y axis	inches	244	mm	6200
Z axis	inches	14,5	mm	370
Disc inclination	degrees	0° - 90°	gradi	0° - 90°
Spindle motor	Mp	25 (S6)	kW	18,5 (S6)
Spindle rotation speed	rpm	800 - 5000	giri/min	800 - 5000
Water consumption	US gam/min	10	lt/min	40
Approximate weight	lb	1190500	kg	5400

DOUBLE BENCH

K-600  
CNC BRIDGE SAW

## Double table, half time!

The entire K600 line is made-up of 5 Axis CNC saws. The machines are powerful, accurate, and reliable. They're ideal for straight, curved, and inclined cuts as well as profiling with either a blade or finger bit. These machines are Sassumeccanica's top product and are considered the most accurate and reliable in the market. Compact, versatile and powerful. Designed and built to provide the maximum performance in the minimum possible space. High rigidity monoblock frame fully hot galvanized. Thanks to the Twin Table, you can increase your range of possible jobs with much higher output.

### 1 Made to last

Thanks to the robust structure made of hot galvanized steel and the superior design, the K600 machines are strong and made to last.

### 2 Accurate

Accurate The X and Y movements are made with linear bearings and helical rack and pinion in order to deliver speed and accuracy.

### 3 Reliable

The high quality and technologically advanced parts make the K600 a very reliable high performance machine that will stand the test of time.

### 4 Versatile

Easy or complex shapes are not a problem. The Sassumeccanica software is fast and versatile whether your making cuts with a blade or shapes with a finger bit.
